Editorial Note

# Principal's Vision

In a landscape defined by unprecedented technological shifts, how do we prepare our students to navigate the unknown with confidence? At Kowloon True Light School, we believe the answer lies in the harmony between a steadfast foundation and an adaptive spirit. This conviction is captured in our theme for the year: "Rooted in Acceptance, Blossoming with Resilience." By embracing our unique heritage and individual talents while accepting the rapid evolution of the digital era, our students learn to stand tall amidst complexity.

This year, we have successfully constructed a Digital Bridge that connects tradition with future-ready innovation. Our students have moved beyond basic digital literacy to become creators and problem-solvers on the global stage. From the Gold Medal success at the iGEM competition to our student team's Silver Award at the 51st International Exhibition of Inventions Geneva, True Light girls are proving that synthetic biology can be harnessed for the greater good. Whether they are using VR to recreate ancient literary scenes or utilising AI feedback to refine public speaking, our students are mastering a powerful synergy of creativity and technological precision.

Our commitment to excellence is vividly reflected in our students' diverse triumphs across all domains of school life. Our hosting of the Wellness Forward: Sports Carnival and Health Expo showcased our dedication to

holistic health, while the 7th International Youth Forum underscored our standing in global discourse. Beyond these, our students have excelled through the SCMP STANCE storytelling competition, the International Elite Dance Competition, and the Microfilm Competition commemorating the 80th Anniversary of Victory in the Chinese People's War of Resistance Against Japanese Aggression. These achievements represent a curriculum that pushes boundaries, including scientific breakthroughs in the Soyvestor Project, and the Biz@TrueLight Entrepreneurship Programme, where students transform creative concepts into viable ventures.

Whether they are engaging in the Consulate-General Visit Programme to gain professional foresight or showcasing vocal precision at the Hong Kong WinterFest, our students remain deeply connected to their social calling. From cross-generational bonding in elderly care endeavours to building resilience in our Rest and Recharge Sleep Expo, and strengthening community ties through our Annual General Meeting, our students demonstrate that they are well-rounded leaders. These experiences, supported by the Local Student Exchange Programme and high-level Model United Nations involvement, empower students to interpret complex social landscapes and advocate for sustainable progress. Through these varied platforms, they emerge as visionary leaders prepared to serve the global community with a clear sense of purpose.

The achievements detailed in these pages are a testament to the synergy between our dedicated faculty and our supportive parent community. By integrating information literacy and ethical accountability into our curriculum, we ensure that the "True Light" our girls carry is one of integrity and responsibility.

As you witness the vibrant stories of discovery within this publication, I invite you to celebrate the resilience of our students. Armed with a global mindset and anchored by strong moral values, every True Light student is equipped to bridge the gap between today's challenges and tomorrow's solutions, making a meaningful and compassionate mark on the world.

# THE DIGITAL BRIDGE – UNITING TRADITION WITH INNOVATION

In an era defined by rapid technological shifts, Kowloon True Light School has emerged as a beacon of educational innovation. From immersive projects that breathe life into cultural heritage to groundbreaking triumphs on the international stage, our students' stories illustrate how digital education fosters a powerful synergy of creativity, resilience, and community.

## Mastering Complexities and Creativity: Problem-Solving Reimagined

AI-powered Math Teaching Assistant

STEPS AI

The journey begins in the classroom, where Artificial Intelligence is revolutionizing engagement. The introduction of Steps AI in Mathematics has been a cornerstone of this initiative, providing students with individualised, step-by-step guidance through the rigours of algebraic manipulation. By deconstructing intricate topics, students do more than just grasp fundamental concepts. They develop the confidence to tackle high-level challenges, cultivating the critical

problem-solving mindset essential for the future landscape.

These tools are far more than academic aids. They are catalysts for real-world impact. Our student team's Silver Award at the 51st International Exhibition of Inventions Geneva for the project "Sleep Better" stands as a testament to this. By translating complex research into a practical solution for sleep apnoea, our students proved that they can iterate quickly and think critically to solve global health issues.

(iGEM) competition

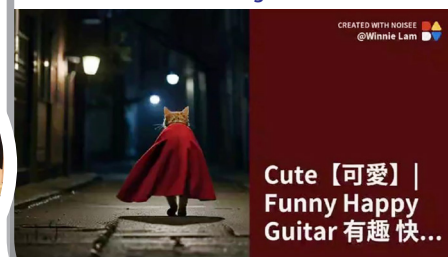

Creativity Award at the History e-Reading Award Scheme

FutureMe Cross-Curriculum Programme

Creating AI Visual Arts Videos

Using AI in Visual Arts

FutureMe Cross-  
Curriculum Programme

This excellence extends across disciplines. Our Biology team recently achieved global acclaim, securing a Gold Medal at the International Genetically Engineered Machine (iGEM) competition. Their innovative biosensor project, "PestiGuard," distinguished them among the top ten high school teams worldwide. Similarly, our History students' Creativity Award at the History e-Reading Award Scheme and the Visual Arts students' Merit Award in the "Love Our Home, Treasure Our Country" competition have featured AI-generated comic strips and exemplified how technology enriches academic performance and fuels artistic passion.

Presenting Solutions to Sleep Apnoea

## Redefining Immersive and Contextual Learning

We believe that technology should bring us closer to our roots, not further away. The Chinese Department's "Heritage on the Tip of the Pen" and the "Recreating Literary Scenes" initiatives use AI-empowered mediums to showcase traditional aesthetics. This vision earned significant backing from The Chinese University of Hong Kong and the Hong Kong Jockey Club for a VR immersive writing project, allowing students to experience cultural history in tangible, perceptible contexts. This fusion was further celebrated in the Yunyou Tongyi Alibaba Cloud Inter-School AI competition, where their project captivated judges with its blend of literature and tech.

In the English Department, the GAVIS VR English speaking programme, a collaboration with the Hong Kong University of Science and Technology, provides students with authentic group discussion practice. By simulating real-world interactions through VR and AI, students hone their communication skills in a dynamic, low-stakes environment.

Conducting virtual group discussions

Another highlight of our year was the "AI Dialogues with War of Resistance Heroes" showcase. Observed by the Under Secretary for Education, Dr. Sze Chun-fai, Jeff, JP, the project received

strong affirmation for its ability to enhance historical empathy. Furthermore, our recent Virtual Reality Programming Workshop in collaboration with the Dai-ichi Japanese Language and Culture School introduced students to the mechanics of the metaverse, paving the way for their future in the digital economy.

### 請截圖展示運用人工智能 AI 優化文章的證明(約 3 個)

州鎮村年俗人稱

「午飯後，中午的圍村，「州鎮村」，藍天白雲，天朗氣清，正門牌匾歷史悠久，世外桃源，人煙稀少，有幾棟的鳥鳴聲，氣勢洶洶的大狀，古老建築，青灰圍牆，建較祠堂，給給人一種舒適，放鬆的感覺。」我是中學生，以「非物質文化遺產之茶樓製作」為題，截圖以上作文優化引言，描寫圍村的環境和氣氛。

#### 非物質文化遺產之茶樓製作

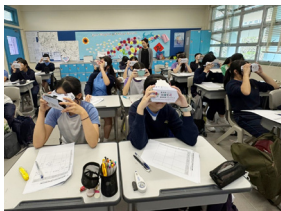

午飯，我們踏足「州鎮村」，鎮頂是藍天白雲，天朗氣清，陽光溫柔地灑在古老的村寨上，村口的正門牌匾歷經風霜，石刻斑駁，卻仍莊嚴地守護著這方水土，彷彿在訴說百年故事。

踏入村中，恍如隔世，世外桃源，青灰的圍牆錯落有致，將都市的喧鬧隔絕在外，村內人煙稀少，寧靜得只聽得見微弱的鳥鳴，偶爾幾聲氣勢洶洶的大狀劃破長空，不但沒有破壞寧靜，反而更添圍村的生活氣息，古老的建築靜立路旁，斑駁的磚瓦牆上青磚綠瓦，每一道裂縫都是歲月的筆跡，讓人彷彿走進了歷史的長河。

Using AI-empowered mediums

## Empowering Future-Ready Educators and Digital Citizens

VR Project for Chinese Language Education

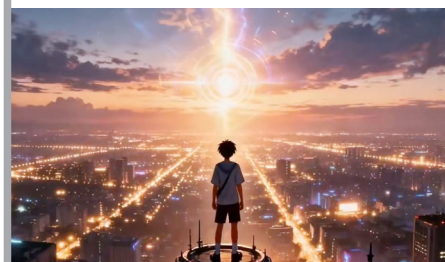

Innovation is only as strong as the educators who drive it. Our Digital Education Team provides comprehensive support, empowering teachers to master Copilot and Gemini for curriculum design and classroom management. Today, AI is integrated into approximately 90% of observed lessons.

Whether it is AI Sport Fitness providing data-informed coaching in Physical Education, or AI-assisted creative production in Music, our school has embraced a diverse suite of e-learning platforms. In Economics, AI generative tools create authentic business scenarios, while English lessons utilise real-time AI feedback, allowing students to compare human observation with machine evaluation to refine their public speaking.

Our leadership in this space is recognised regionally. Principal Lee's invitation to speak at the 2025 Smart Education Forum in Macau, alongside our partnerships with UNESCO's International Research Centre on Artificial Intelligence (IRCAI) and the Zhejiang-Hong Kong-Macao Schools Digital Education Alliance, reflects our dedication to technological advancements and the Sustainable Development Goals (SDGs).

As we look to the future, we remain anchored by an AI Use Policy that prioritises ethics and accountability. By integrating information literacy into the S1 Citizenship, Economics & Society and Junior Secondary Computer Studies curricula, we ensure our students navigate the digital age with skill, responsibility, and integrity. By anchoring cutting-edge technology in strong moral values, we transform the challenges of the digital age into opportunities for profound personal growth.

## Beyond the Digital Bridge- Our Vision for Tomorrow

AI教育共享 | AI助力順逆成長：共築勵志演說 展現女性力量

文：香港津貼中學議會、九龍真光中學何樂彤老師

At Kowloon True Light School, we are building the Digital Bridge that empowers every student to step into the future with a spirit of innovation and a heart for humanity. Our graduates emerge not just as tech-savvy students, but as compassionate, resilient individuals equipped to make a meaningful mark on the world.

Looking ahead, we are committed to refining a curriculum where AI serves as a catalyst for linguistic precision and dynamic feedback, allowing our students to achieve new heights of communication and artistic ingenuity. Moreover, our roadmap prioritises AI for Wellbeing, ensuring that technology serves to balance and support the emotional health of our learners. By aligning our innovative spirit with the UN Sustainable Development Goals, we nurture a global mindset in every True Light girl.

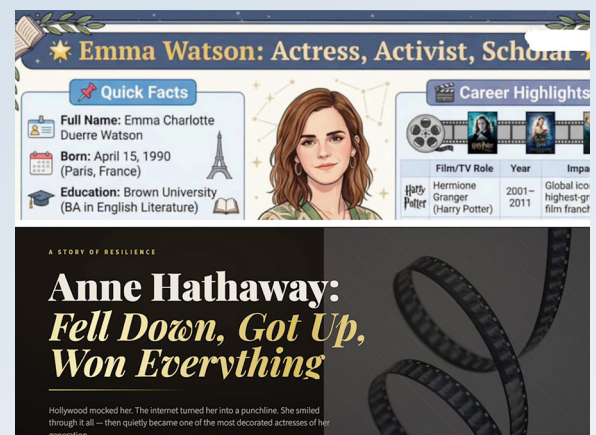

We envision a future where our students do not just use AI, but harness it as a force for ethical progress, building a world that is as technologically advanced as it is sustainably and compassionately led.

Gold Medal in the International Genetically Engineered Machine (iGEM) competition

# Scientific and Mathematical Disciplines

At Kowloon True Light School, we empower our students to lead in an increasingly complex technological landscape through a curriculum that transcends the traditional classroom. They consistently demonstrate excellence, most notably clinching a Gold Medal at the International Genetically Engineered Machine (iGEM) competition for their work in synthetic biology. Whether engaging in the Cyberdefenders Alliance Competition or the 28th Hong Kong Youth Science and Technology Innovation Competition, students develop the analytical prowess required to thrive in global academic arenas.

We bridge the gap between secondary education and cutting-edge research through real-world experiences. Our students have benefited from "A Day of Learning with Professor Lam Hon-ming" and the Soyvestor Project, focusing on sustainable biotechnology, alongside academic visits to universities. On campus, initiatives like STEM Week and Mathematics Days transform abstract theories into tangible practices. By blending rigorous inquiry with creative application, we ensure every student develops scientific literacy and curiosity to shape the future of discovery.

Literacy at True Light transcends simple reading. It is about finding one's voice in the evolving world. From the Star of Literature national writing awards to success at SCMP STANCE, Asia's inaugural storytelling competition, our students prove themselves as eloquent communicators in both English and Chinese.

Our Chinese Culture Week and English Week create an immersive environment where language transcends the textbook, encouraging students to engage in vibrant discourse that sharpens both their cultural identity and their command of the English language. Meanwhile, traditional roots are nourished through calligraphy activities and joyous festivals. We ensure every True Light girl possesses the confidence to lead conversations and inspire change.

# Broadening Intellectual Horizons

We nurture insightful thinkers who are deeply engaged with both national history and global progress. Our students demonstrate exceptional analytical talent, emerging as Champions in the Microfilm Competition commemorating the 80th anniversary of the War of Resistance and the Tianda Policy Research Essay Competition. These achievements, alongside engagements like National Geography Day and hands-on fieldwork, reflect a sophisticated ability to conduct rigorous research and interpret complex social landscapes.

# Creative Endeavours

Our performing arts teams continue to set the standard, recently securing a Gold Award in the International Elite Dance Competition. This excellence extends to our School Choir and Acappella Team, who received a Silver Award at the Hong Kong Inter-School Choral Festival and performed at the Hong Kong WinterFest. Our Visual Arts department also shines, with students participating in gifted education programmes in Beijing and earning the Second Runner-up in the Chinese Traditional Costume Innovation Design Competition.

# Celebrating Sportsmanship

In celebration of the 15th National Games, our school led the way in hosting the Wellness Forward: Sports Carnival and Health Expo. Centred on the pillars of Knowledge Vitality, Courageous Spirit, and Digital Empowerment, the event brought our community together through the guidance of our vibrant mascots: Smarty, Mighty, and Techy. With the esteemed support of The University of Hong Kong and the Hong Kong Police Force, guests and visitors tested their limits in the All-around Obstacle Challenge and the cutting-edge Esports Cycling Race. Spanning eight immersive themed zones, the carnival successfully championed holistic health and the National Games spirit for both our own students and visitors from over 40 primary schools.

# Global Insights and Reflections

The 7<sup>th</sup> International Youth Forum empowered True Light students to host a vibrant exchange of ideas with 100 participants from 12 schools across the region, including delegates from Guangzhou and Jakarta. Graced by the Under Secretary for Education, Dr Sze Chun Fai, Jeff, JP, students explored sustainable progress through the Society, Environment, and Culture framework. The forum highlight saw our students secure the First Prize for their innovative four-stage solution of AI Identification, Animal Therapy, Gamified Partnerships, and Long-term Companionship, standing alongside top schools in the region. This experience has deepened their commitment to the United Nations Sustainable Development Goals, transforming them into proactive ambassadors for global change.

King George V School Model United Nations Conference

Global Week

Our students broaden their horizons through Model United Nations, developing the negotiation and leadership skills vital for global citizenship. Complemented by Global Week and a diverse curriculum of Japanese, French, and Spanish language classes, students build the linguistic and cultural fluency required to navigate a connected world. By engaging with diverse viewpoints, they transform into active participants in international dialogue, ready to drive meaningful and sustainable change on the global stage.

# Student Leadership and Social Connections

True Light girls have emerged as compassionate leaders, committed to serving the community with empathy and purpose. Through the KTL Light Bearer Service Learning Training Programme and the 4C Youth Volunteer Leadership Project, they cultivate the essential skills to spearhead meaningful social initiatives. Our students embrace every opportunity to refine their leadership style, inspire others and effect positive change, with students receiving the Hong Kong Outstanding Student Public Welfare and Social Service Award and the Kowloon City District Outstanding Student Award.

Red Packets Recycling

By actively engaging in hands-on service, students weave social responsibility into their daily lives. They champion environmental stewardship through beach cleanups and foster cross-generational bonds during elderly care endeavours. Through strategic collaborations with local organisations, as well as participation in the MuseTeens Youth Leadership Scheme, they tackle real-world challenges with innovative solutions. Ultimately, our students transform into proactive global citizens, ready to lead and serve with a heart of love.

We place great emphasis on our peer support network, where senior buddies play a vital role in welcoming S1 students into the True Light family. Birthday celebrations and lunchtime gatherings ensure a warm, inclusive atmosphere. Through a balanced mix of pastoral care and form-based activities, we ensure that every student grows into a confident, compassionate, and resilient young woman.

# Empowering Educators

The excellence of True Light education is rooted in the continuous professional growth and visionary leadership of our staff. Our Principal's recent conferment of the Medal of Honour from the HKSAR Government stands as a testament to the school's dedication to service and educational distinction. This leadership extends to the wider academic community, with our Principal invited to share expertise on the future of Science and Innovation Education at institutions such as The Chinese University of Hong Kong.

The First Meeting of Parents' Academy

# Home-School Partnership

We believe that a strong partnership between school and home is the cornerstone of student success. The Parents' Academy Meetings provide a vital platform for parents to engage with the school's mission and stay informed about modern educational practices. Our 42<sup>nd</sup> Annual General Meeting and the election of the Parent Manager to the IMC demonstrate the high level of transparency and collaboration we maintain with our parent body.

Engagement goes beyond formal meetings. We foster a community spirit through shared experiences like film appreciation sessions and dedicated parents' meetings. By working together, we create a supportive environment that reinforces the values taught in the classroom, ensuring that every student has a consistent and nurturing foundation both at school and at home.
